

AF-P900

PROCESS PUMP / Industrial Pumps

Designed around the process, environment, and maintenance reality it has to support. This reference sheet outlines the platform's standard configuration envelope.

TECHNICAL SPECIFICATION

PARAMETER	REFERENCE VALUE
FLOW RATE	1,250 m3/h
MAXIMUM PRESSURE	40 bar
OPERATING TEMPERATURE	-20 C to 180 C
MATERIALS	316 SS / Duplex
DRIVE	Direct / VFD-ready

APPLICATIONS

Process infrastructure · Water and utilities · Energy transfer · Continuous-duty production

CONFIGURATION NOTES

Axiom systems are reviewed against duty point, materials compatibility, access, controls integration, and applicable site requirements before release for manufacture.

STANDARD SUPPORT

Application analysis · System engineering · Factory testing · Commissioning · Lifecycle support

Sample technical document for portfolio demonstration. Confirm final performance, materials, and compliance requirements against the approved project specification.
