

CX-250 MODULAR CONVEYOR LAYOUT PACK

AXIOM ENGINEERING RESOURCE

Reference dimensions for early-stage conveyor planning and layout coordination.

01 Set the route

Confirm transfer points, elevation changes, service clearances, guarding, and the required routing modes before fixing conveyor length.

02 Coordinate the interfaces

Coordinate structural steel, drives, chutes, electrical drops, dust control, and safe inspection access with the surrounding plant layout.

03 Release for detail

Use the reference dimensions for early coordination, then confirm belt width, loading, support spacing, and site conditions in the approved layout.

This reference is intended to support early-stage engineering conversations. Final selection and compliance requirements remain project-specific.
