

CX-900

HEAVY-DUTY CONVEYOR / Conveyor Systems

Designed around the process, environment, and maintenance reality it has to support. This reference sheet outlines the platform's standard configuration envelope.

TECHNICAL SPECIFICATION

PARAMETER	REFERENCE VALUE
THROUGHPUT	Up to 3,500 t/h
BELT WIDTH	1,200-2,400 mm
INCLINE	Up to 18 deg
FRAME	Heavy structural steel
MONITORING	Condition-ready

APPLICATIONS

Process infrastructure · Water and utilities · Energy transfer · Continuous-duty production

CONFIGURATION NOTES

Axiom systems are reviewed against duty point, materials compatibility, access, controls integration, and applicable site requirements before release for manufacture.

STANDARD SUPPORT

Application analysis · System engineering · Factory testing · Commissioning · Lifecycle support

Sample technical document for portfolio demonstration. Confirm final performance, materials, and compliance requirements against the approved project specification.
