

T900

THERMACORE THERMAL SYSTEM / Thermal Systems

Designed around the process, environment, and maintenance reality it has to support. This reference sheet outlines the platform's standard configuration envelope.

TECHNICAL SPECIFICATION

PARAMETER	REFERENCE VALUE
TEMPERATURE	Up to 900 C
CHAMBER VOLUME	20-160 m3
FUEL OPTIONS	Gas / Electric / Hybrid
CONTROLS	Redundant PLC
EMISSIONS	Configured to site requirements

APPLICATIONS

Process infrastructure · Water and utilities · Energy transfer · Continuous-duty production

CONFIGURATION NOTES

Axiom systems are reviewed against duty point, materials compatibility, access, controls integration, and applicable site requirements before release for manufacture.

STANDARD SUPPORT

Application analysis · System engineering · Factory testing · Commissioning · Lifecycle support

Sample technical document for portfolio demonstration. Confirm final performance, materials, and compliance requirements against the approved project specification.
